

# MOHD NADEEM

Hyderabad, Jahanuma .

☎ 9398300727 ✉ [codewithnadeem@gmail.com](mailto:codewithnadeem@gmail.com)  [linkedin](#)  [github](#)  [Portfolio](#)

## Education

### ISL ENGINEERING COLLEGE

Bachelor of Science in Computer Science

June. 2020 – May 2024

Hyderabad, Telangana.

## Experience

### Code Linear

May 2023 – July 2023

Front End Developer

Remote

- My primary responsibility is to create **visually appealing and user-friendly interfaces** for websites. by translating design concepts into **responsive, interactive, and accessible web pages**. My expertise lies in utilizing programming languages like **HTML, CSS, JavaScript, and React** to implement the structure, layout, and styling of websites. By ensuring a **seamless user experience across various devices and browsers**. I collaborate closely with **designers and back-end developers** to bring ideas to life while **optimizing performance and usability**.

### Coding ninjas

March 2023 – July 2023

Teaching Assistance

Remote

- In my role, As a teaching assistant in data structures and algorithms for **C++**, my primary responsibility is to ensure that students have a strong conceptual understanding of the subject matter. I have been able to **mentor over 120** students in **DSA** and **problem-solving**. I have solved over **350+ doubts** with an average rating of **4.9**, which demonstrates my **effectiveness** in this area.

## Projects

### BeFoodie | JavaScript, React JS, Tailwind CSS

April 2023

- Its a **Food Ordering app** Where I am using **Swiggy-API** for all my data and its completely **config driven UI** which uses a **configuration file** to define and **customize the behavior and appearance** of the UI components
- Added a **Shimmer UI** for better user interaction and Here I use **dynamic routes** for navigation and **Lazy Loading** to improve the performance of site
- For **state management** I use **Redux Toolkit** It helps in **manage the state** of the application in a **predictable, centralized way**.  
( *Live-Demo* ) ( *GitHub-link* )

### TutorialHub | React JS, Tailwind CSS, Material UI And Youtube-V3 API

March 2023

- A video-sharing platform like **Youtube** . It includes basic features like **video search, video playback, and displaying a myriad of videos sorted by different categories**.
- Channel pages provide **comprehensive details about content creators**, Our homepage **categorizes videos into recommended, comedy, and tutorial sections**, ensuring users can **easily discover and enjoy diverse content**.
- Allowing users to **search for videos using keywords and categories**. It offers seamless video playback with essential features like **play, pause, and seek**. The video playback page includes **related video suggestions, enhancing the viewing experience**.  
( *Live-Demo* ) ( *GitHub-link* )

### News-Express | JavaScript, Tailwind CSS, React JS and API integration

February 2023

- Voice-assisted news app** The app incorporates **Alan AI** for **complete voice command functionality**, allowing users to easily specify their **preferred news source, channel, and categories** using voice commands.
- Global news access** Through **API integration**, the app provides users with access to **news from around the world**, ensuring **up-to-date and comprehensive coverage of global events**.
- The Web app categorizes news articles **intelligently, simplifying user access to specific areas of interest**. Users can **listen to articles being read aloud and open them for further reading, enhancing their news consumption experience**.  
( *Live-Demo* ) ( *GitHub-link* )

## Technical Skills

**Languages/Frameworks** : C/C++, HTML, CSS—Tailwind, ,JavaScript , Bootstrap, ReactJS, NodeJS, ExpressJS, MongoDB , NextJS , Git/GitHub, Material-UI

**Developer Tools**: VS Code, Eclipse, Google Cloud Platform, FireBase

## Leadership / Extracurricular

### Web development Club

Spring 2022 – Present

CO-Head

Isl engineering college

- Completed **Hacktoberfest 2022** with **15+ Pull Request** in that **10+** got **merged successfully**
- Helping my junior to **kickstart** web development journey by conducting **webinar's** and **Hackathon's**
- Participated in **Two Hackathon's** and Solved around **500+** DSA question on various platform like **gfg, leetcode, codechef, codeforces** .and **5** start on **Hacker rank**
