Education

ISL ENGINEERING COLLEGE   Hyderabad,India
Bachelor of Science in Computer Science   *Dec 2020 - April 2024*

Experience

Front End Developer   May 2023 - July 2023
Code-Linear - Remote

- Design **visually appealing** and intuitive web interfaces using **HTML, CSS, JavaScript, and React**. Collaborate with designers and developers to **optimize performance** and deliver **seamless user experiences**.
- Implement captivating web interfaces with a focus on **responsiveness, accessibility, and optimal performance**. Drive **cross-functional** collaboration to **exceed expectations** and deliver **user-centric websites**.

Teaching Assistance   March 2023 - July 2023
Coding ninjas- Remote

- As a teaching assistant in **data structures and algorithms (DSA)** for **C++**, I prioritize ensuring students' strong conceptual understanding. Mentored over **120** students in DSA and **problem-solving**, successfully resolving **350+** doubts with an average rating of **4.9**, showcasing my effective teaching abilities.

Projects

TutorialHub | Live-site | GitHub

- Developed a **video-sharing platform** similar to YouTube with features like **video search, playback, and categorization.**
- Channel pages provide **comprehensive details** about content creators,Our homepage categorizes videos into recommended, **comedy, and tutorial sections**, ensuring users can easily discover and enjoy **diverse content**.
- Optimized video discovery by categorizing videos into **recommended, comedy, and tutorial sections** on the homepage. Seamless video playback with essential features like **play, pause, and seek**. Enhanced viewing experience with **related video suggestions**.

BeFoodie | Live-site | GitHub

- A food ordering app by integrating **Swiggy-Api**, implementing a **config-driven UI** and dynamic routes. Employed **Shimmer UI and Lazy Loading techniques**
- Utilized **JavaScript, React JS, Tailwind CSS, and Redux Toolkit** for streamlined state management, **optimizing data flow** and enhancing **user experience**.

News-Express |. Live-site | GitHub

- **Voice-assisted news app** with complete voice command functionality, **global news access**, and **intelligent categorization**. Users can specify preferred sources and categories using **voice commands**.
- Implemented **API integration** for up-to-date coverage of global events. Users can **listen to articles**, enhancing the news consumption experience. Utilized **JavaScript, Tailwind CSS, React JS**, and API integration for development.

Technical Skills

Languages : C, C++, HTML, CSS, JavaScript
Frameworks : React.js, Next.js, Material-UI, REST APIs
Developer Tools : Git, Firebase, MongoDB, VS Code
Course Works: Data Structures and Algorithms, DBMS, Operating System, System Design, Computer Networks

Achievements and Leadership Skills

- Completed **Hacktoberfest** 2022 with **15+ Pull Request** in that **15+** got **merged successfully**
- Came in top **20** of **Hack In-vision** Hackathon organized by Muffakham Jah College
- Solved around **500+** DSA question on various plate-form like **gfg**, **leetcode**, **code chef**, **codeforces** .
- **5 start** on **Hacker rank** and **2 start** on **Code chef**
- Came in top **30** of **Hack Revolution** Hackathon organized by Nawab shah alam college
- Helping my junior to **kick-start** web development journey by conducting **webinar's** and **Hackathon's**
