Education

ISL ENGINEERING COLLEGE   June. 2020 − May 2024
Bachelor of Science in Computer Science   *Hyderabad, Telangana.*

Experience

Coding ninjas   March 2023 − July 2023
Teaching Assistance   *Remote*

- As a teaching assistant in data structures and algorithms for **C++**, my primary responsibility is to ensure that students have a strong conceptual understanding of the subject matter. as well as helping students **debug their code and troubleshoot**.
- In my role, I have been able to **mentor over 120** students in **DSA** and **problem-solving**. Through this experience, I have developed a strong understanding of the common challenges and misconceptions that students often face when learning these concepts.
- One of my strengths as a teaching assistant is my ability to help students solve problems and overcome obstacles. I have solved over **350+ doubts** with an average rating of **4.9**, which demonstrates my **effectiveness** in this area.

Projects

BeFoodie | *JavaScript, React JS, Tailwind CSS*   April 2023

- Its a **Food Ordering app** where you can add to **cart** food item and **checkout** for making payment
- Here I am using **Swiggy-Api** for all my data and its completely **config driven UI** which uses a **configuration file** to define and **customize** the **behavior and appearance** of the UI components
- Added a **Shimmer UI** for better user interaction and its **fully-responsive** and **User Friendly**
- Here I use **dynamic routes** for navigation and **Lazy Loading** to improve the performance of site
- For **state management** I use **Redux Toolkit** It helps in **manage the state** of the application in a **predictable, centralized way**.   **(Live-Demo) (GitHub-link)**

Pixagenerator | *JavaScript,React JS, Node JS, MongoDB and Open-AI*   March 2023

- This is an **Dall.E-AI** clone which take user prompt and **generate image** according to **user prompt**
- User can **Create, Upload and Download** the images and its **Fully-Responsive** site.
- **Feature** are : **User prompt to image , sharing of image with community, dowloading other user's images**
- **Open-API** integration for **image generation**   **(Live-Demo) (GitHub-link)**

News-Express | *JavaScript, CSS—Tailwind CSS ,React JS and API integration*   February 2023

- This is an **News's App** with **voice assistance** support using **Alan AI**
- User can speify **NEWS source** , **NEWS Channel** ,**NEWS categories** and it can **Read the** NEWS and open article's also.
- **API integration** for news information and classifying into **different section for AI**
- **Feature** are : **complete voice command application, Access NEWS from through out the world**
- Adding **comprehensive conversational AI Platform to create and manage intelligent and contextual in-app voice assistants**   **(Live-Demo) (GitHub-link)**

Technical Skills

Languages/Frameworks : C/C++, HTML, CSS—Tailwind, ,JavaScript , Bootstrap, ReactJS, NodeJS, ExpressJS, MongoDB , NextJS , Git/GitHub, Material-UI
Developer Tools: VS Code, Eclipse, Google Cloud Platform, FireBase

Leadership / Extracurricular

Web development Club   Spring 2022 − Present
CO-Head   *Isl engineering college*

- completed **Hacktoberfest** 2022 with **15+ Pull Request** in that **10+** got **merged successfully** and **Learn** so much
- **Prompting web development** and helping my junior to **kickstart** web development journey conducting **webinar's** on **Open-Source** contributions and **Hosting Hackathon's** on web development for health competition
- participated in **Two Hackathon's** where I build some amazing project using **open-AI and more ..**
- Solved around **500+** DSA question on various plate form like **gfg**, **leetcode**, **codechef**, **codeforces** .and **5 start** on **Hacker rank**
